

<b>2010 Primary 1-Hour Sulfur Dioxide (SO<sub>2</sub>) Standard – Round 1 Nonattainment Area Designations</b>								
<b>County Name</b>	<b>Area</b>	<b>Date Designated Nonattainment</b>	<b>Effective Date of Nonattainment Designation</b>	<b>State Implementation Plan Due</b>	<b>Attainment Date</b>	<b>Date Reclassified to Attainment w/ Maintenance Plan</b>	<b>Date Maintenance Plan is to be Revised (8 years after being Redesignated)</b>	<b>Notes</b>
Daviess	Veale Township	7/25/2013	10/4/2013	4/6/2015	10/4/2018			An attainment demonstration was signed by IDEM on October 2, 2015, and document hardcopies were mailed and electronically submitted via email to U.S. EPA on October 6, 2015.
Marion	Center, Perry, and Wayne Townships	7/25/2013	10/4/2013	4/6/2015	10/4/2018			
Morgan	Clay and Washington Townships	7/25/2013	10/4/2013	4/6/2015	10/4/2018			
Pike	Washington Township	7/25/2013	10/4/2013	4/6/2015	10/4/2018			
Vigo	Fayette and Harrison Townships	7/25/2013	10/4/2013	4/6/2015	10/4/2018			

On June 3, 2010, the United States Environmental Protection Agency (U.S. EPA) revoked both the primary annual and 24-hour sulfur dioxide (SO<sub>2</sub>) standards and established a new primary 1-hour SO<sub>2</sub> standard (75 FR 35520). U.S. EPA intends to address the designations for all other areas in Indiana not listed above in separate actions in the future.

To attain the primary 1-hour SO<sub>2</sub> standard, the 99<sup>th</sup> percentile of 1-hour daily maximum concentrations, averaged over three years, must not exceed 75 parts per billion (ppb).
